

MODEL, CONTROL & MONITOR SOLAR + STORAGE PROJECTS

The only end-to-end software solution that provides a cohesive suite of project modeling, storage control, and asset monitoring products.

Here For Your Entire Project's Lifecycle

- ▶ Identifying Opportunities
- ▶ Modeling and Proposing
- ▶ ESS Procurement
- ▶ Installation Support & Commissioning
- ▶ ESS Control
- ▶ ESS Monitoring

OPERATING MODES

- ▶ Demand Charge Management
- ▶ Demand Response Programs
 - ▶ Time-of-Use Arbitrage
 - ▶ PV Self-Consumption

CONTROL ETB Controller

ETB Controller with Acumen AI™ software combines behind-the-meter value streams to generate the highest revenues for your energy storage project. Best-in-class technology coupled with leading domain expertise.

SPECIFICATIONS

Operating modes for maximum bill savings

Participate in current & future value streams

OEM warranty and incentive program operations

Demand response programs participation

Integrated with top-tier hardware providers

Industry-standard communication protocols

Successful project deployment history

MODEL ETB Developer

Gold standard, industry leading software platform for modeling and proposing the economics of solar and storage projects. Trusted by over 1,200 organizations worldwide to accurately, objectively and transparently analyze projects.

SPECIFICATIONS

Import interval data or baseline a 365-day profile

110,000+ utility rates, in-house databases

Model any type of NEM or FIT scenario

Integrated with leading storage hardware providers

Customized white-labeled, fully branded proposals

Powerful simulation & optimization engines

Best-in-class customer service & support

MONITOR ETB Monitor

Robust monitoring software providing real-time insights into the operational performance and savings of your solar + storage systems. Directly connected to your modeling and control software.

SPECIFICATIONS

Track dollar savings in real-time & compare vs. baseline

Cloud-hosted, accessible from any device

Measurement and verification of solar + ESS fleet performance

Configure alerts (e.g., low SOC, inverter down)

System logs provide detailed operational data for OEM's

Directly connected to ETB Developer and ETB Controller

Enroll your sites in demand response programs

Your Ideal Partner in Solar + Storage

TRUSTED

Gold standard industry reputation. Widely considered the market leader for utility rate and avoided cost analysis of solar + storage projects.

DOMAIN EXPERTS

Software built BY developers FOR developers. Experts in utility rates, policies, incentives, NEM frameworks, and modeling project economics.

BANKABLE

Backed by a global, publicly traded parent company with a 40-year track record and one of the strongest balance sheets in the industry.

TRANSPARENT

We're obsessed with accuracy and clarity. We precisely calculate utility bills and avoided cost in a transparent and defensible fashion.

BEST-IN-CLASS SERVICE

Our account management team provides personalized on-boarding, training, and support to tailor our products to fit your specific needs.

END-TO-END

One cohesive platform to model, control, and monitor projects. Enables developers to confidently develop and deploy solar + storage.

Work with the Energy Toolbase Team for:

- ✓ Utility Rates
- ✓ DER Policy
- ✓ DER Project Development
- ✓ Data Science
- ✓ Machine Learning
- ✓ Software Engineering
